Note: From 2000 to 2002, Non-Resident Alien students were included in Total Minority Enrollment by placing these students under the appropriate racial category. During this period, adding these students in the Non-Resident Alien category as well as the appropriate racial category would result in double counting. In 2003, Non-Resident Alien students are shown as a separate group and not reported in the other categories. The Other category represents students who did not report their racial group. OSRHE reports these students in the largest category (white) when reporting these students to IPEDS.
