Show Me the Money!

Graduates with an Environmental Health Science degree typically earn between $54,000 and $70,000 for entry-level jobs. As a college graduate, you can earn an average of 75% more than those with only a high school degree, per

The Chicago Tribune!
(NACE 2021 Salary Report)

› Coursework

EHS is an interdisciplinary field of study that includes the natural and social sciences and the application of those sciences to the areas of environmental health and environmental protection. The EHS program at ECU is the only BS-EHS degree program in Oklahoma and has maintained accreditation through the National Environmental Health Science and Protection Accreditation Council since the beginning of the program in 1970. The EHS program prepares students for employment as environmental health specialists, public health fields or resource managers across both the public and private sector agencies. The EHS program also prepares students to enter a wide range of graduate programs in Environmental Health, Public Health and Environmental Sciences.

› Nationally Accredited Programs

The Environmental Health Science program contributes to the overall mission of ECU by offering a Bachelor of Science degree in Environmental Health Science. The EHS program is one of 28 programs nationally accredited by the National Environmental Health Science and Protection Accreditation Council (www.nehspac.org).
