Education & Psychology
Centennial Endowment

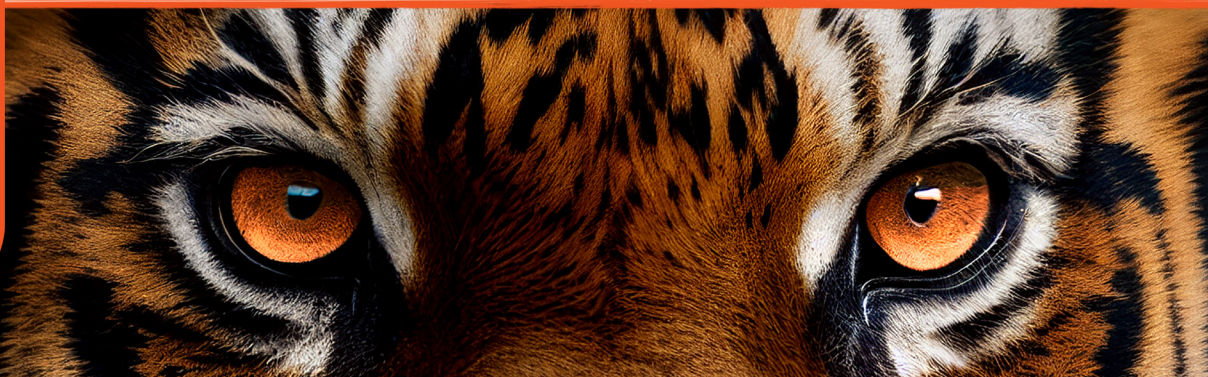

Physical activity – an integral part of the educational experience – contributes effectively to a student's general development. The Department of Kinesiology gives students the means to educate the total person. The study of human movement is the unique content of the Kinesiology program. The Department of Kinesiology provides students with the knowledge and skills necessary to make lifestyle choices which positively impact one's health and well-being. The Kinesiology Department also provides support courses for other majors and teaching concentrations.

> Flexible Education

In order to meet the career needs of our students, the Department of Kinesiology not only offers a wide variety of courses, but we offer those courses in a variety of formats to meet the needs of students. All Kinesiology courses are taught once a year in a traditional face-to-face or offered 100% online. If you are interested in our fully online program, please visit online ecok.edu for more information.

DEPARTMENT OF KINESIOLOGY

>DEGREE OPTIONS

Bachelor in Kinesiology

The Kinesiology program prepares students for careers in the fitness/wellness profession, as well as research-oriented careers. Every year Kinesiology graduates are accepted to graduate school where they continue their education to become athletic trainers, occupational therapists, physical therapists, physicians'

assistants and numerous other professions. The coursework for this degree includes a core of courses in the broad field of Kinesiology and additional specialty courses in Exercise Science concentrating on knowledge and skills necessary for appropriate exercise testing, prescription and leadership.

Master in Sports Administration

This program offers a 30-hour plan of study designed to provide the financial, legal, promotional and organizational knowledge necessary to manage sports programs and/or athletic facilities. This fully online program is structured to fit most schedules. Degree plans are available for students who plan to graduate in one or two years.

While the program is a Master of Education, the students do not need to have a degree in Education, nor do they need a teaching certificate to be admitted to the program. Graduates are currently employed in all levels of athletics and sports-related fields. The program is designed to improve the student's current employment as well as help students gain employment in desired fields through internships and directed learning.
