EHS 2313 Solid & Hazardous Waste Mgmt	
B. Required for Minor-Electives	12
12 Hours approved electives in Environmental Health Sciences*	

Additional Reqs to reach a Double Major: Environmental Health Science

Having fulfilled all the requirements for a bachelor's degree in a chosen field, a double major may be declared if, instead of a minor, all the requirements for a second major are also fulfilled. No major course may count as credit toward another major, excluding related work. Should a student meet requirements for two majors and have a minimum of 150 semester hours, they can apply for two degrees instead of one degree with two majors. Information may be obtained in the Office of Admissions and Records concerning how to apply for two degrees granted concurrently.

**"Teachers" or "methods" courses may not be counted in minor.*
